DIANA MINJI CHUN

I make complex systems work better for the people who rely on them every day through thoughtful co-creation. With 9 years across enterprise and civic work, I translate user need and organization requirements into simple, accessible experiences by designing with both the people who use a system and the staff who run it.

EDUCATION

Carnegie Mellon University

School of Design
Pittsburgh, PA
Master of Design
May 2021

Washington State University

School of Design and Construction Management
Pullman, WA
B.S. Architecture
Minor in Fine Arts
May 2014

SKILLS

Product Design: E2E design · Interaction design · Visual design · Prototyping · Usability testing · Accessibility · Design systems and component libraries · Journey mapping · Developer handoff

Design Research: Interviews · Usability testing · Behavioral analytics · A/B experimentation · Co-design workshops · Participatory methods · Equity-centered design · Stakeholder presentations

Tools: Figma · FigJam · VS Code · Claude Code · GitHub Copilot · Adobe CC

AI Practice: AI-assisted design · Figma-to-code Vibe-coding · Daily AI workflow integration

OTHER

Microsoft Global Hackathon

Hack for Good 2nd place
Aug 2020

Lead Facilitator

PEPS (Early parenthood support)
2024 - 2025

Community for Youth

Youth Mentor
Oct 2021 - Oct 2022

EXPERIENCE

Product Designer
Microsoft, Growth

July 2021 - Present
Redmond, WA

- **Led end-to-end design of a privacy consent experience** across 5 platforms and 5 products for 800M+ users, using a service blueprint to align Legal, Data, Product, and Marketing on shared goals to meet DMA, GDPR, and CCPA requirements.
- Designed the internal AI-driven experimentation platform, **balancing AI intelligence with human editing** so teams deliver growth experiments faster.
- **Designed onboarding and engagement features for diverse audiences,** grounded in qualitative and quantitative data on how workers from different backgrounds discover Copilot, engage with it, and become confident using it.
- **Drove a 12% engagement increase across 6–7 shipped freemium features** through interviews, usability testing, behavioral analysis, and iteration.
- **Served as accessibility owner, achieving Microsoft's highest accessibility ratings** (WCAG, Section 508), and contributed to a more inclusive Microsoft design system.
- **Actively using AI tools in research and prototyping** to work faster, sharing only approved data and checking AI findings with original sources.

Co-Design Researcher
Carnegie Mellon University, School of Design

May 2020 - May 2021
Pittsburgh, PA

- **Executed a successful six-month participatory design sprint** co-creating a community budgeting process with low-income residents near Pittsburgh, in partnership with New Sun Rising nonprofit
- **Designed, facilitated, and reported out on co-creation workshops**, translating community priorities into opportunity maps, governance frameworks, and a grant model the community adopted.

Product Design Intern
Microsoft, Education

May - Aug 2020
Redmond, WA (Remote)

- **Designed and presented to senior stakeholders** on how the Microsoft Education platform could **support student autonomy and confidence** through the assignment submission flow.

Lead Designer
Dec 2017 - Aug 2019

Junior Designer
Aug 2016 - Nov 2017

Syzygy Events International
Washington, D.C.

- **Led brand, visual, and experiential design for 400+ civic and government events** including US White House, Congressional Black Caucus, Politico, and National Geographic
- **Managed full project lifecycle** from stakeholder requirements gathering to design execution, coordinating with clients, internal creative teams, and external vendors while maintaining budget and timeline adherence
- **Hired, trained, and managed two designers,** providing mentorship and design direction while building team capacity.
